

NRC Exec Committee - 25 April 2022

Comms Equipment Update

I am now storing the equipment at home - all radios, loud hailers and PA system

Currently seems to be working well and upkeep of equipment along with tracking seems to be working well. Currently awaiting confirmation from Alan as to if the payments have been received for the two clubs.

As an update - equipment cost £900, so far I have £815 worth of hire on the books across 4 competitions with 3 more requests to price up - so in a very short time, it will pay for itself and continue to provide a valuable service to the region.

Request for small budget for consumables to cover replacement batteries for Loudhailers and potential cover for replacement of a Radio or 2 and a couple of loudhailers if required

1 or 2 radios	= £90/£180
Batteries	= £13 for 12 D Cell batteries
1 or 2 Loudhailers	= £40/£80

So depending on what the committee see as reasonable - I would request £200 to begin with as this would cover the replacement of 2 radios or 5 loud hailers etc
